

Tissue Grinders

A Product Line of Biomedical Polymers

All Tissue Grinders:

- Fully assembled
- Gamma sterilized
- Easy-to-open Tyvek® package
- Includes extra cap
- Instructions For Use
- Includes patient identification label

BMP Tissue Grinders

Closed System Prevents Exposure to Sample Aerosols

BMP Tissue Grinders are engineered for safety and ease of use. The closed system design provides the ability to grind the specimen in a sealed container, helping to prevent any risk of contact with the sample. The narrow pestle eliminates the problem of sample overflow common with other tissue grinders. The molded-in abrasive surface does not leave any sediment to obstruct the sample during examination.

Standard Molded-In Abrasive Tip

Item #	Description	Case Weight	Case Pack
BMP-TG-700	15 mL conical	3 lbs. 1.36 kg	10 per case
BMP-TG-702	35 mL free-standing	4 lbs. 1.81 kg	10 per case
BMP-TG-704	50 mL conical	4 lbs. 1.81 kg	10 per case

BMP Ultra Tissue Grinders

Vitrified, Silica Cast Pestle Tips Provide Enhanced Grinding Capability for Difficult Samples

The pestle tips of the new BMP Ultra Tissue Grinders have been vitrified using a proprietary silica casting process. The result is a glass-like abrasive surface that provides a more aggressive grinding action to enable efficient processing of difficult and fibrous samples. BMP Ultra Tissue Grinders incorporate the same closed system as our standard grinders.

Item #	Description	Case Weight	Case Pack
BMP-TG-706	15 mL conical	3 lbs. 1.36 kg	10 per case
BMP-TG-708	50 mL conical	4 lbs. 1.81 kg	10 per case

Vitrified Tip
